## Lubricants - Lubmarine

### **Lubmarine White Paper Offers Shipping Operators the Latest Insights To Effective Marine Lubrication.**

**Paris, December 15, 2021:** A new white paper – “*Adapting to Life in the Post IMO2020 Landscape*” – is published today by marine lubricant specialist, Lubmarine, providing vessel owners and operators with key insights into the vital role that correct lubricant selection and onboard lubrication oil management plays in preventing costly engine failures.

The new 40-page white paper looks at the key impacts experienced by the shipping industry’s transition to IMO2020 and beyond.

It reveals the critical role that a correct lubrication strategy can play in helping vessel operators ensure safe and reliable engine operation, minimize risk, and ultimately extend engine life expectancy.

“The aim of the white paper is to provide operators and engineers with additional insights, advice and guidance, enabling them to truly understand how vital correct lubrication selection and ongoing analysis is in the post IMO2020 landscape.” said Lubmarine General Manager, Arnaud Guichard.

This white paper forms part of a series of reports that are being launched by TotalEnergies to provide the shipping sector with critical insights across a range of key industry topics. It reinforces the company’s commitments across the entire marine-related value chain – including marine fuels, lubricants, fuel additives, and battery technology production, as well as in its shipping operations.

“Using the right lubricant in the right amount to deliver optimum performance together with smart engine monitoring is the goal every vessel operator is ultimately seeking. Our goal through this white paper is to guide operators and help drive home the importance of engine cleanliness,” added Lubmarine Global Marketing Manager, Serge Dal Farra.

#### **Notes to Editors**

The first White Paper was launched by TotalEnergies Marine Fuels on December 6, 2021. Titled “*The Drive for Cleaner Marine Fuels*”, it looks at the key drivers shaping the move to shipping’s decarbonization, key timelines motivating the transition and TotalEnergies’ investments, plans, and collaborations to help its shipping customers make an effective and successful move to lower and zero-carbon fuels of the future.

### **About the Marketing & Services division of TotalEnergies**

TotalEnergies' Marketing & Services business segment offers its professional and private customers a wide range of broad energy products and services—petroleum products, biofuels, charging and related services for electric vehicles, gas for road and maritime transportation—to support them in their mobility and help them reduce their carbon footprint. Every day, over 8 million customers visit our 16,000 service-stations all over the world. As the world's number four in lubricants, we design and sell high-performance products for the automotive, industrial and maritime sectors. And to provide the best response to the needs of our B2B customers, we deploy our sales forces, our international logistics network and our diverse offering. We operate in 107 countries, where our 31,000 employees stand close to all of our customers.

### **About TotalEnergies**

TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity. Our 105,000 employees are committed to energy that is ever more affordable, cleaner, more reliable and accessible to as many people as possible. Active in more than 130 countries, TotalEnergies puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people.
